THE GOAL OF THE CHALLENGE

CHARAL 2026 is held within **MICAI 2026**, the Mexican International Conference on Artificial Intelligence.

THE PROBLEM

Generative AI is easy to adopt **passively**, as a shortcut that does the thinking for the learner.

OUR GOAL

AI systems that **interact with, audit and evaluate** the learner or researcher, so that critical thinking and deep reasoning actively increase.

THE SHIFT

From **detecting AI use** to **demanding higher-order thinking** when AI is used, with rigorous engineering and data governance.

Cognition First: AI that elevates human thinking, not replaces it.

CHALLENGE TRACKS

Build AI systems that **elevate human cognition** instead of acting as a shortcut. Choose one track:

TRACK 1 · AI SYSTEMS FOR REVIEWERS

Tools that help educators, thesis boards and journal reviewers **audit reasoning and synthesis**, not just grade final outputs.

e.g. rubric analysis, questioning engines for grading, LLM-as-a-Judge, reasoning-graph dashboards.

Auditing & Evaluation

TRACK 2 · AI SYSTEMS TO STIMULATE COGNITION

Systems that **challenge learners' thinking in real time** and prevent passive AI reliance by demanding reflection, synthesis and deep reasoning.

e.g. reflective writing assistants, conceptual-mastery co-pilots, Socratic dialogue for research drafting.

Active Learner Engagement

INVITED SPEAKER

Dr. Enrique Cortés Rello

Director, AI Hub · Tecnológico de Monterrey

"The Intersection of AI in Education and Building AI Learning Systems"

Keynote · 9:15–10:00 AM CST

- Leads one of Latin America's most relevant **applied AI ecosystems**
- Implements secure, scalable and regulated AI in manufacturing, construction and infrastructure
- Combines technical development with **enterprise AI governance**: reliable, auditable, impactful systems
- Contributes to ethical and regulatory AI frameworks, treating AI as strategic infrastructure
